

# LUCAS DURAN

FULL STACK DEVELOPER || WEB DESIGN

## About me

I am Lucas Duran from Argentina. I am a Full Stack Dev graduated from BootCamp soyHenry. I consider myself a communicative, versatile person who can easily adapt to work teams. I am strongly oriented to the Front-End in search of new challenges to continue creating.

- **English level:** Basic learning

### Competencies:

- Ability to adapt to the team or work method
- Problem resolution
- Fast learning whether self-taught or not

### Projects - Full-Stack:

- **Group Project: Pet-Care**
- **Repositories:** <https://github.com/luigi3357/Pet-Care-React-Js>
- **Web:** <https://pet-care-front-deploy.vercel.app/>
- A website was developed to connect people who offer pet care services with people who require a pet carer.
- Developed by a **team** of 8 people.
- Work focused mostly on the **Front-End** with **React.js** and **Redux** and also on Back-End Routes with a **PostgreSQL** and **Express** database for routing management.
- Developed with agile methodology (**SCRUM**), weekly sprints and presentations to a Product Owner belonging to the Henry **staff**.
- **Web Apps:**
- 1) **Pokedex(PokemonApi)**
- **Repositories:** [github.com/lucasduran33/Pokemon-main-SPA](https://github.com/lucasduran33/Pokemon-main-SPA)
- **Web:** <https://pokemon-spa-api.vercel.app/>
- Page that shows pokemons and their details giving the possibility to create a pokemon through a form controlled with Javascript.
- Development of a SPA with **React, Redux, Node, Express, Sequalize** and **PostgreSQL**
- 2) **Lama web(E-commerce)**
- **Repositories:** [github.com/lucasduran33/Food-main-SPA](https://github.com/lucasduran33/Food-main-SPA)
- **Web:** <https://lama-e-commerce.vercel.app/>
- Lama is an e-commerce website with a front-end design that shows clothing and fashion products available for purchase
- Development of a SPA with **React, Styled-Components**
- **Api weather(App movil)**
- **Repositorio:** [github.com/lucasduran33/React-Native-WheaterApp](https://github.com/lucasduran33/React-Native-WheaterApp)
- App made with **react-native** and **expo**, using your location it shows time, day and weather for the next few days, it also shows extra weather details.
